# THE PRACTICAL NURSERYMAN

and Horticultural Advertiser.

Vol. 7.

CHICAGO, ILL., APRIL 15, 1899.

No. 4

TO NURSERYMEN, SEEDSMEN AND FLORISTS.

THE PRACTICAL NURSERYMAN  
—AND—  
HORTICULTURAL ADVERTISER.

**W. F. HEIKES, Editor and Manager.**  
1308-1310 Unity Building, Chicago, Ill.

Issued monthly on the 15th. Sent only to those in the trade. We do not solicit subscriptions. If you value THE PRACTICAL NURSERYMAN, please accept it with our compliments. Our circulation covers a list of over 2,400 selected names of customers and correspondents, made up through many years of active wholesale business. Every name represents a buyer of nursery stock, and this list contains only the names of those who buy at wholesale.

Advertisements 10c. a line agate; \$20.00 a page; one-half page \$10.00; one-fourth page \$5.00. Advertisements must be received one week before the day of publication. Orders for advertising amounting to less than \$5.00 will not be accepted. Discounts: 3 times 5 per cent.; 6 times 10 per cent.; 12 times 25 per cent.

The circulation of this Journal will be confined strictly to Nurserymen, Florists and Seedsmen, and only invited advertisements of articles pertaining specially to these trades will be inserted.

# Heikes-Huntsville-Trees.

BULLETIN NO. 7.

## SURPLUS STOCK

—FROM—

## The Huntsville Wholesale Nurseries

**HUNTSVILLE, ALABAMA.**

Shipments from St. Louis, Chicago, Omaha and Philadelphia

...AT...

## ONE DAY'S NOTICE

WE have for the past nineteen years offered in assorted lots, at St. Louis, in spring, such stock as we had in surplus. Herein is a schedule of what we now have in St. Louis, Chicago and Omaha for immediate shipment. The stock is exclusively of our own growing at Huntsville, Alabama, fresh dug this spring, and packed in the best manner in moss, and warranted in fine condition. Everything is fine of the grade, with full fibrous roots, and not culled, as we adhere to a strict system of grading.

### **BELOW THE BLIZZARD LINE.**

Our nurseries are far enough south to escape the severe freezing weather. Everything is bright, green and fresh—sound to the tips. Nearly all the sorts offered are standard sorts, such as most nurserymen can use in assortment with their own growing. Orders should be sent in as soon as possible, but the stock need not be shipped until wanted, as we are prepared to hold it in good condition. We have nothing for sale not offered on this list.

It will be noticed by some of our correspondents that we have refused orders the past season for several articles listed. Our fear of overselling and some countermands account for this. We ask attention to the small-sized trees offered for transplanting into nursery rows. All of the small trees, as well as the large ones, are very nicely rooted, and everything is young, smooth and bright.

We can refer to nurserymen who have bought of us in nearly every State and Territory. We can give satisfaction, and guarantee it for these shipments.

**TERMS.**—Cash with order, or 30 to 60 days from date of shipment to responsible prompt-paying parties. In box lots the price of boxes is included, but the price of boxes on orders filled from the Nurseries is extra. The cost of drayage will be charged in both cases.

For convenience in telegraphing, a cipher is given. The cipher word stands for one box only in cases where there are more than one in the same assortment.

Address,

**W. F. HEIKES, Manager,**

**1308-1310 UNITY BUILDING,**

**CHICAGO, ILLINOIS.**

CHICAGO, ILL., April 17th, 1899.

For further conditions concerning risk of transportation, claims, etc., see Huntsville Wholesale Nurseries' pages in **THE PRACTICAL NURSERYMAN**.

# CHICAGO, ILL.

All correspondence should be addressed to 1308-1310 Unity Building Chicago, Ill. Our Huntsville office will remain at Huntsville as heretofore, but will be closed until the packing season opens, October 1st. In the meantime all correspondence should be addressed to our Chicago office. Mr. Heikes expects to be at Huntsville during the packing season, and will give the same careful attention to business there as in the past.

## Chicago, St. Louis, Omaha and Philadelphia.

The following lists show what we offer from our several distributing points. We offer our surplus stock this year in Box Lots only, except for Roses. We will break boxes in Roses and supply the assortment desired, not less than 10 of a variety. All Roses are tied in bunches of 10, and we are not prepared to rehandle them in less numbers.

The prices quoted on Box Lots include the cost of boxes and the freight from Huntsville to our several distributing points--the drayage charges at these points are to be paid by the purchasers.

### PERFECT DORMANT CONDITION.

Our stock is all in perfect dormant condition, and we are prepared to keep it so until the end of the season, as everything is now in cold storage.

In ordering one or more boxes of certain varieties, state what substitution will be allowed should we be sold out of lots or sorts desired. When the postoffice address and the railroad station differ, always give explicit directions for shipping with each order.

## THE GREAT BLIZZARD.

Our nurseries at Huntsville escaped injury from the great blizzard, before which all merchantable stock had been dug and placed in cellars preparatory to packing and shipping. Everything we offer this spring is perfectly sound and free from injury from frost.

# Field-Grown Roses,

## OWN ROOTS.

### Roses Are Now All in Chicago.

We will pack orders for Roses in such numbers as may be desired, not less than 10 of a variety of the same grade. These plants are now tied in bunches of ten, and we have no facilities for rehandling in smaller numbers.

These Roses are nearly all on their own roots, grown from cuttings by Heikels-Biloxi Nurseries Company, Biloxi, Miss. They are in fine dormant condition, and we are prepared to hold them in good order until May 10th, if desired.

The No. 1 plants made a growth of two to four feet, and have three or more branches, cut back to 24 to 30 inches. They are handsome in tops and roots, and cannot fail to give satisfaction.

**Packing.**—All will be packed in moss in the best manner. The price of boxes and bales is to be added to quotations. We deliver to transfer companies, and the cost of drayage will follow as advanced charges, or be added to the bill.

We make a grade of Roses called No. 1½. This grade will be made up of plants just under No. 1 such as do not have the required number of branches, or slightly under weight and height.

**No. 2 PLANTS OF ABOVE VARIETIES FOR TRANSPLANTING AT ONE-HALF THE PRICE OF NO. 1.** The tops of No. 2 plants will be cut back to 2 or 3 inches, as they are only intended for transplanting. No. 2 grade all sold.

**GRAFTS.**—A few varieties marked g. are grafts. When marked c. g. they are both grafts and own roots.

**MARECHAL NEIL**—Our No. 1 plants of Marechal Neil are very fine shaped plants, 3 to 4 feet high. They are made from grafts, which produce plants of much better style than those grown from buds.

1 Box containing 2500 Marianna Stocks, 3-16 to $\frac{1}{2}$ .....	<i>Maggie</i>	10 50
1 Box containing 6000 Marianna Stocks, 2-16 to 3-16.....	<i>Mazzard</i>	17 50

### DESCRIPTIONS.

**SUDA CHERRY**—This variety is like Wragg, but is claimed to be superior. It is a most remarkable bearer.

**EARLY LAMAURIE**—This is the earliest of all sweet cherries. Color, black.

**KERR PLUM**—One of the finest Japan plums. Clear golden yellow; size, large. A good substitute if short of yellow plums.

**EVERBEARING PEACH**—We insert in this issue a colored plate of this remarkable variety, made by the J. Horace McFarland Co., Harrisburg, Pa., from whom duplicates can be obtained. We can testify to the correctness of this representation of the everbearing qualities of this variety, as we have seen the fruit when ripe and in all stages of growth upon the same branch. We have a good stock of these trees for sale for the fall of 1899.

### INSPECTION.

Our nurseries at Huntsville and Biloxi are free from injurious insects, and we have inspector's certificates to that effect.

### TELEGRAPH CODE.

Use the Nurseryman's Telegraph Code in telegraphing. Anyone not in possession of a copy will be supplied upon application.

### BULLETINS.

We will issue bulletins every five or six days showing what we have left for sale. If they are not received regularly, please inform us.

## BARGAIN LOTS.

Write for the address of the growers of these lots to W. F. HEIKES, Manager, 1308-1310 Unity Building, Chicago, Ill.

Lot 4—60,000 Grape Vines. Maryland Moore's Early, one year, No. 1, at \$7 per M; 2 years, at \$11 per M.

Lot 9—Currants—Western Michigan. London Market, one year, No. 1, \$10 per M, \$2 per 100. Victoria, fine one-year tops on two and three year roots, one foot and up, \$8 per M, \$1.50 per 100. Packed in moss f. o. b. Samples free to intending buyers.

Lot 11—Strawberries—Central Arkansas. 1,000,000 Michel's Early, 25,000 Crescent, 150,000 Hoffman, 50,000 Tennessee Prolific, \$1.25 per M f. o. b. 100,000 Excelsior, \$6; Bush Cluster, the greatest improvement in all strawberries, \$6 per M. Limited supply of latter. Good condition guaranteed to destination.

Lot 13—Northern Mississippi. 500,000 Lady Thompson Strawberries. The only good berry found that will stand a long drought. Plants are very fine. Price \$1 in lots of 10,000 or more f.o.b.

Lot 16—Eastern Pennsylvania—250 Altheas, 6 to 8 feet, \$12.50 per 100; 300 Exochorda Grandiflora, 4 feet bushy, \$7 per 100; 1,000 Duetzeas, assorted 5 to 6 feet, \$7 per 100; 1,000 Wisteria Sinensis Seedlings, 12 to 18 inches, \$2.50 per M; 500 Wisteria Magnifica, 18 to 24 inches, \$2.50 per 100.

Lot 19—Middle Arkansas. Strawberries. 25 years' experience. 500,000 Excelsior, new large, extra early, firm, high colored, \$6 per M; 500,

000 Michel, 90 cents per M; 200,000 Creecent, \$1.25; 200,000 Clyde, \$2. Other varieties in proportion. F. o. b.

Lot 20—Central Illinois—25,000 Pecans, 1 year, \$20 per M; 5,000 large Shell Bark Hickory, 1 year, \$20 per M; 8,000 Native Persimmons, 1 year, \$20 per M; 2,000 Sugar Maple, 4 to 8 feet, fine, \$10 per 100. Boxed and f. o. b.

Lot 21—Eastern Maryland—50,000 Lucretia Dewberry, No. 1 tips, lots of 5,000 and over, \$3.50 per M; less than 5,000, \$4 per M. Plants must be shipped before April 1st, 1899.

Lot 23—Northwestern Iowa—25,000 Russian Mulberry 18 to 24 inches, extra fine, \$2.50 per M; 25,000 Russian Mulberry, 10 to 18 inches, extra fine, \$1.75 per M; 10,000 Houghton Gooseberry, 1 year, No. 1, extra fine, \$10 per M; 10,000 Currants, 1 year, No. 1, extra fine, \$10 per M. Boxing extra.

Lot 28—Delaware—15,000 London Raspberry transplants, \$12.50 per M; 25,000 Eldorado Blackberry sucker plants, \$8 per M; 25,000 Logan Berry, field grown, \$25 per M; 5,000 Lucretia transplants, \$6 per M. Strawberry plants: Carrie, \$6 per M; Nick Ohmer, \$8 per M. Other varieties in proportion. Peach trees, \$10 to \$35 per M.

Lot 29—Central Illinois—Choice lot of Downing Gooseberries, cheap to close out, as ground must be cleared this Spring. 8,000 strong 2 years in 500 to 1,000 lots, \$10 per M. 25,000 1 year old, well rooted, at \$5 per M., f. o. b.

We invite correspondence from those having specialties or a surplus, which they want to sell quickly at low prices.

# COMMERCIAL VALUE OF JAPAN PLUMS.

## HARDINESS COMPARED WITH PEACHES.

**THEY STAND THE COLD.**—I am growing these plums in orchards quite extensively in Connecticut and in Georgia, and am convinced that many of the varieties have points of merit that will make them permanently valuable orchard fruits in these two sections, but in the central Atlantic States, say from south of Philadelphia to South Carolina, they bloom so early that they are often liable to be caught by spring frosts. At the North they will stand a great deal more freezing than peaches. I think it is safe to plant them anywhere where the mercury does not go much below 25 degrees below zero. In my orchards in Connecticut at this time, peach buds, even on the most hardy varieties, are all killed, and while the plum buds are hurt somewhat, there are more than enough left for abundant crops; probably very severe thinning will have to be resorted to to secure full size fruit.

**IN THE SOUTH.**—In Georgia, the middle of February, after weeks of warm weather, many of the plums coming out in bloom and peach trees just showing the pink, peach buds were entirely killed and trees badly injured, yet enough buds were left alive on some of the varieties of Japan plums so that there will be quite a little crop of fruit. For two or three years, varieties like Red June, Abundance and Burbank have been shipped to the northern markets from Georgia, and sold on an average 25 per cent higher than peaches, with an increasing demand each year for the fruit. In New England, they have been marketed for the last three years to a considerable extent, have sold 50 per cent higher than peaches in the same markets, and the demand has always been ahead of the supply. They have thick, tough skins, and are not seriously injured by the curculio. Trees will thrive on very light, thin soil, or on that quite heavy and moist. The quality of the fruit is good, and they can be kept in the market from one to two weeks after being picked from the tree in fair eating condition.

**THE BEST SORTS.**—Red June, Abundance and Burbank are the most satisfactory of the well-tested varieties. Satsuma needs more maturity of tree before coming into full bearing, for while the first three named will fruit freely two or three years after planting, Satsuma requires about five. Of the newer sorts, Wickson is the largest and most attractive in appearance, while the Hale is best in quality of all the Japans; but these two varieties and the Satsuma are extra early bloomers, and on this account, more liable to be caught by late frosts in spring than some of the others. Of other well-tested sorts, Willard and Berckmans should be rejected as far too poor in quality to be worthy of propagation. Ogon and Normand, both yellow varieties, are vigorous and productive trees, but not very high in quality. Chabot, sometimes known as "Yellow Japan," "Chase," etc., is a late ripening plum of fine appearance and good quality. The Gold is a small, weak-growing tree, with fruit somewhat like the Ogon, only not so good in quality.

Many new varieties are being tested; probably some of them will prove of greater value than those we already have, and an orchardist will not go astray in planting the best ones here mentioned. Every one who owns a family fruit garden in the central northern States makes a big mistake if he does not have a good number of these trees on his grounds, for the best of the Japan plums can be grown almost as cheaply and abundantly as the most common apples.

J. H. HALE, in *Rural New Yorker*.

## SPRAYING AND SPRAY MIXTURE.

### BORDEAUX MIXTURE.

**USE GOOD LIME.**—In the first place, one should be sure to get the purest white lime. This is a limestone country, and our best lime can be bought for about 15 cents per bushel, but I would rather pay \$1 a bushel for the best Norwalk white lime than take this as a gift. The Norwalk lime, if properly used, will be almost as constant in solution as milk. It is also necessary to get the lime fresh and unslaked, and I find that, if slaked in boiling water, plenty of it, and well stirred while slaking, it will be much finer, and stay in suspension very much longer. I also find that if the lime and copper sulphate are put together when strong, they form a curdly mass which can never be reduced so as to work satisfactorily.

**A STOCK SOLUTION.**—When spraying, I make a stock solution of copper sulphate, one or two pounds to the gallon. I then slake the lime in a barrel so as to have it of the consistency of thick cream; this should be kept covered so as to keep it perfectly clean. Now, instead of putting these stock solutions together in the proper proportions in the spray tank, and adding water, better fill the tank half or more full of water, and dip the needed amount of sulphate solution into this, stirring well before the lime is added. Then add plenty of water to the lime solution, and stir until like thin milk. If let stand an instant, the heavy particles will subside, and the thin lime milk can be dipped into the tank of dilute solution; if well stirred, it will not settle in a long time.

By constantly adding more water to the lime solution, it can be nearly all dipped off, and nothing taken that will in the least obstruct the nozzle. When the operator thinks he has lime enough, and the mixture is well stirred, it should be tested with the ferrocyanide of potassium test, and lime added so long as it shows any color. [This test is made by adding a few drops of a 20-per-cent solution ferrocyanide of potassium. So long as dissolved copper exists in the mixture the addition of this chemical causes a reddish brown precipitate to appear. Lime should be added till no change takes place when the reagent is added.—EDS.] It is well to add a gallon or two of milk of lime beyond what is necessary to neutralize the sulphate; especially should this be done if Paris-green is used with the mixture.

**THE ARSENIC POISONS.**—I prefer Paris-green to London-purple, because it is more uniform in strength, but I like the arsenite of lead better than either. It costs no more, will stay in suspension better, and is fully as destructive to insects; then there is no danger of injuring the foliage by using it. To make this mixture, dissolve 11 ounces acetate of lead (common sugar of lead) in four quarts of water, also dissolve four ounces of arsenate of soda in two quarts of water, using wooden, glass or stone wear to hold these solutions. When dissolved, pour them, one at a time, into 40 or more gallons of water, and add enough to make 100 or 150 gallons, according to the purpose for which it is to be used. If for canker worms, not more than 100 should be used. The same strength is right for potatoes.

J. S. WOODWARD, in *Rural New Yorker*.

**Terms and Conditions Governing Quotations in the Price List of the Huntsville Wholesale Nurseries.**

**RATES.**—As we send this list to the trade only, we make the difference in prices between the 10, 100 and 1000 rates very slight—simply sufficient, as a rule, to cover the difference in the expense of handling in the smaller numbers. We uniformly tie in bunches of 10, when consistent with the order, and we suggest to our customers to make their orders for varieties in multiples of 10 as far as practicable. Orders for 50 and not over 300 trees, if for not less than 10 of a variety, will be charged at the rate per hundred. orders requiring 300 trees or more, and not less than 10 of a variety, will be filed at the lowest quoted prices. Orders for less than 10 trees of one variety, will be charged at the rate per ten.

**SEASON.**—Our packing and shipping season begins by the 20th of September, and continues until about the first of March.

We have great advantages to offer here in early shipments for the North in Spring. We do not accept orders for trees we do not grow, as we never buy trees to sell again. You can depend upon us for fresh dug trees. Each order is taken up separately, and not until it is wanted for shipment.

**SHIPPING DIRECTIONS.**—We respectfully beg our patrons to furnish us with explicit *directions as to shipping*, and the mode of conveyance by which they desire trees forwarded. When no particular directions are given, we forward according to the best of our judgment. *But in no case do we assume any responsibility as to safe delivery and condition of Trees and Plants after a proper shipment by us.*

**RELEASE.**—When prepayment of freight is not required, we will Release and Guarantee, and take forwarder's receipt and mail to consignee. It is left to the option of the shipper of trees over some railroads, whether he will release them or not under the clause "Value less than \$5.00 per 100 lbs." If released under this clause, the freight is less on roads governed by this classification, and we will assume it to be proper to make this release, without reference to the value of the trees, unless instructed to the contrary. This clause does not apply upon roads under some of the district classifications, and because of this confusion we will not be held responsible for any oversight to release, unless instructed by our customers. Claims for delay or loss must be made to the forwarders.

**PACKAGES.**—The cost of package must be added to the prices quoted in this list, as follows: Boxes 30 inches square, from 7½ to 9 feet long, as the trees may require, each \$2.50; boxes 24 inches, \$2.00; boxes 18 inches, \$1.50; bales from 25c. to 75c. each.

**PACKING.**—Goods will be packed in moss, and especial care taken to insure their arrival in the best condition.

**ASSORTMENTS.**—We do not require customers to take an assortment they do not wish, but will sell one variety alone if desired. If any substitution can be allowed, either in grade or variety, it should be so stated when making the order. As a rule we do not substitute without permission.

**CAUTION.**—We accept all orders upon the condition that they shall be void, should any injury befall the trees from frost, hail, storm, fire, or other causes over which we have no control.

**TERMS.**—Cash. When desired, we will allow 30 to 60 days from date of shipment to responsible,

prompt-paying customers. Parties with whom we have had no business transactions, will save time by sending reference, with order. We wish it expressly understood that payment is expected from the first collections made, and the time named is only intended as so many days of grace in which to make returns. To northern customers, who wish to lay in stock for Spring trade, we will ship late in Fall or early in Spring, and allow time for payment till May 15th. If shipment is required in the Fall for Spring use, a note is to be given upon receipt of the trees. We do not allow any discount for cash, but we make our prices low to command cash, or prompt returns. In orders when the time is not mentioned, 30 days is to be understood. Interest at the rate of 8 per cent per annum must be paid on over due accounts. Should prices be changed, either higher or lower, during the season, the prices ruling at the time the order is made, are expected to stand.

**FORMS OF PAYMENT.**—All bills are payable at the office of the seller, and remittances should be made by drafts on New York, Chicago or St. Louis, or by money orders on some Express Company, or by postal orders. We will, however, accept checks from those of our customers who may be located at places having no banking, express or postal facilities, provided they make them in every case payable "with exchange", or add 1/4 of one cent, to the amount of the bill for the cost of collection.

**GRADES.**—We grade very carefully, in some cases by caliper, in others by height. When graded by both caliper and height, the caliper must govern, as the height then named is only to be considered approximately. When graded by height or caliper, we include the lower number and exclude the higher. Instance: in a grade of 4 to 5 feet trees, the 4 feet trees are included, but not the 5 feet trees. If 5 feet trees are wanted, the 5 to 6 feet grade must be ordered.

**GUARANTEE OF GENUINENESS.**—While we exercise the greatest diligence and care to have all our Trees, etc., true to label, and hold ourselves in readiness, on proper proof, to replace all trees, etc., that may prove untrue to label, free of charge, or refund the amount paid, it is mutually understood and agreed to, between the purchaser and ourselves, that our guarantee of genuineness shall in no case make us liable for any sum greater than that originally received for said trees, etc., that shall prove untrue.

**ACCEPTANCE.**—Notice should be sent us by telegraph, at our expense, if there is any cause of complaint, or should the trees be refused, stating reasons. Claims for deduction, from whatever cause, will receive consideration only when made promptly upon the receipt of the trees. If trees show any signs of shrivelling upon arrival, they can usually be restored by being thoroughly watered and buried entirely under the ground for two or three days. Should there be any frost in the trees upon arrival, they should not be removed from the box until the frost is all out. The box should be placed in the cellar or protected in some other way. The presence of frost in the boxes is not to be considered an evidence of bad condition, as we pack to secure the trees against damage, if the frost is allowed to come out in the natural way. Goods will be considered accepted if removed from the boxes in which they are packed, without notice of complaint to us and without our orders for their disposition.

Seaford, Sample,

WITH A FULL LIST OF

## Strawberries, Peaches,

and other Fruits.

(911)

ESTABLISHED 1829.

## Blackberries A Specialty.

EARLY HARVEST, the earliest, eating qualities of the best.

AUSTIN'S IMPROVED or MYERS' HYBRID DEWBERRY. Early, large and of the best.

MAXWELL'S EARLY, earliest large Blackberry, requiring no stakes.

It is difficult to overestimate the value of a blackberry as large or larger than WILSON'S EARLY, and ripening as early as EARLY HARVEST. Very large, sweet, luscious, very productive. Ripens before strawberries are gone or at same time with Lucretia Dewberry and Early Harvest, and is three times as large as the latter. Free from rust, Double Blossom or other disease.

LUCRETIA DEWBERRY, claimed to be the best of the blackberry family, as productive as any. Its eminent success in all soils is something phenomenal. Its trailing habit makes it less liable to winter kill.

LOVETTS, best in small quantities.

TAMMANY, a new sort from Louisiana, said to be the largest and earliest of all.

LOGAN BERRIES, HYBRID, large and productive.

TEXAS ALBINOS, a white novelty, productive and good.

CHILDS' MAYBERRY.

Prices cheerfully given on application.
